

Alberta Gambling Research Institute

Position Statement on data management and sharing

The Alberta Gambling Research Institute is committed to ensuring that the outputs of the research it funds, including research data, are managed and used in ways that maximize public benefit. Making research data widely available to the research community in a timely and responsible manner ensures that these data can be verified, built upon and used to advance knowledge and its application to generate improvements in health.

The Institute will foster an environment that enables researchers to maximize the value of research data. Specifically, the Institute will work in partnership with others to:

- ensure that key data resources are developed and maintained for use by the research community;
- recognize the contributions of researchers who generate, preserve and share key research datasets; and,
- develop best practice for data sharing in different fields - recognizing that different data types raise distinct issues and challenges.
